TSIS 4 - Team Competencies

Group: 21 | PM: Dinmukhamed Zhenissov | 15 October 2026

Scope: computer and office accessories marketplace prototype. Four RACI areas (PM, DEV, UX, QA) are combined across three people. Ayan remains the backend lead; frontend integration follows the previous TSIS 4 allocation.

Team

Member	Role	Primary responsibility
Dinmukhamed Zhenissov	PM / product owner	Scope, schedule, reports, priorities and demo coordination.
Ayan	Backend lead / frontend integration	Go API, PostgreSQL, role checks, catalogue, cart and orders; technical UI integration.
Usmanov Shingiskhan	UI/UX / QA	Screen designs, usability, test scenarios and defect reporting.

Required competencies

Competency	Required level	Why
Go / REST API	Intermediate	Auth, catalogue, cart and order services.
PostgreSQL / SQL	Intermediate	Related records and atomic order creation.
HTML / CSS / JavaScript	Intermediate	Buyer screens and API integration.
UI/UX design	Intermediate	Clear catalogue and checkout flow.
Git / GitHub	Intermediate	Shared code and review without overwriting work.
API / functional testing	Intermediate	Role permissions, approval and ordering.
Planning / reporting	Intermediate	Charter, backlog, costs and weekly updates.
Communication / coordination	Intermediate	Soft skill: resolve dependencies and workload.
Speech API / smart search	Intermediate	Voice permissions, editable transcripts and rule-based search.

Current levels

Initial self-assessment. Beginner: basic skills; Intermediate: independent routine work; Advanced: complex work and mentoring.

Competency	Dinmukhamed	Ayan	Shingiskhan
Go / REST API	Beginner	Intermediate	Beginner
PostgreSQL / SQL	Beginner	Intermediate	Beginner
HTML / CSS / JavaScript	Beginner	Intermediate	Beginner
UI/UX design	Beginner	Beginner	Intermediate
Git / GitHub	Intermediate	Intermediate	Beginner
API / functional testing	Beginner	Intermediate	Intermediate
Planning / reporting	Intermediate	Beginner	Beginner
Communication / coordination	Intermediate	Intermediate	Intermediate
Speech API / smart search	Beginner	Beginner	Beginner

Gaps & actions

1. Git: Shingiskhan is Beginner, below the required Intermediate. Ayan pairs with him on a branch, commit and review exercise by 18 October.

2. UI implementation backup: PM and QA are Beginner in HTML/CSS/JavaScript. Ayan documents one catalogue API integration example; Shingiskhan repeats it by 22 October.

3. Database backup: PM and QA are Beginner in SQL. They run five documented queries with Ayan by 25 October.

4. Voice-search gap: all members start at Beginner, below required Intermediate. Ayan implements recognition and search rules; Shingiskhan tests denial, no speech and text fallback by 22 October.

5. Development concentration: Ayan is the only Intermediate API developer. PM limits work in progress to two stories; QA pairs on negative tests by 1 November.
